What will Essco Calibration Laboratory do for you?

Is fast turnaround important to you?

If your answer is yes, then you are in agreement with over 1300 companies who have chosen Essco to provide the fastest turnaround available.

We have a staff of 55 people, which include:

- 28 certified metrology technicians serving your needs in our lab or at your facility.
- Our fully staffed second shift allows us to provide rush overnight service of your equipment when you need it.
- 5 customer service representatives serving you Monday through Friday from 7 a.m. to 5 p.m.
- A fleet of telephone-dispatched pickup/delivery vans driven by equipment handling specialists covering New England on a daily basis.

Do you get the runaround trying to get status on your instruments?

When you call with a question, we will have your answer immediately. Our customer service specialists use our unique bar coding system to track and control your instruments from pickup to delivery.

Can you afford to have your equipment leave your building?

Our technicians will come to you. Our mobile calibration team, consisting of 10 field technicians, have the training and technical skills to calibrate the majority of your electronic and mechanical instrumentation at your facility.

Are you spending too much of your valuable time dealing with too many calibration vendors?

We provide one-stop shopping by offering the widest range of calibration services of any lab in New England. We will manage your entire instrument inventory, including sub-contracting to a qualified source or original equipment manufacturer when necessary. Our LabMate® software will manage your inventory database and provide computerized recalibration notices on a monthly basis.
